Veterinary anaesthetic monitoring record

LOG TEMPLATE

Check this template against your local regulations and your own policies before you use it.

Business _____ Location _____ Date _____

- Write the patient, owner, weight, procedure, and the premedication and induction drugs with their doses and times at the top.
- Record every parameter at least every five minutes from induction until the patient is extubated and stable.
- Tell the vet straight away about any value outside the limits your practice sets, and record what was done.
